

Willow – Goffins Cockatoo

Willow – Goffins cockatoo, Male. Willow was sent here without any history. He has some areas on his face and neck where he was plucked. Most of these areas have since re-grown, but I believe he was most likely a breeder and was plucked by his mate. I think he is approximately 20 years old. He was in a pet home before he came here, but he is a little shy. He has been quarantined, tested for psittacosis and bacteria. He has no known health problems and seems very well adjusted despite being shy. If I could find a mate for him I would keep him in my aviary.

Adoption Fee - \$500
